

Go beyond valet with Premium.

Make parking simpler and controlled, add contactless parking, enhance the guest experience and maximize yield.

Hospitality is in our roots. The guest experience begins with their first impression, which is usually within your parking lot or garage. We've custom built solutions around parking as a new revenue center. Our products enable elevated, customer-focused arrival experiences that are tailored for hotel properties, but also trusted anywhere superior service is desired – hospitals, venues, office buildings and beyond. Our local parking advisors help align parking with your property's operational, service and financial goals.

Streamlined Parking Management.

- Control and monetize unpaid parking without added capital expense or equipment.
- Assign and manage parking access for employees, tenants and vendors. Instantly enable and deactivate parking. No revenue leaks.
- Digital parking credentials with complimentary or paid parking for guests. Bill to their room folio or enable self-payment. No hang tags required. Secure, accountable, trackable.
- Enable self-parking to attract revenue from nearby demand generators (venues, attractions, airports).
- Add easy to use, contactless mobile payment options to start parking from any smartphone.

Introduce New Parking Experiences.

STAR SPACES®

Get your VIP guests closer to your front door, like an instant suite upgrade

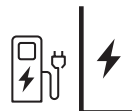

PARK & RIDESHARE

Near an airport? Sell parking to travelers without the need for shuttles
