

# Have all your PTAC & HVAC units tuned up at zero cost to you!

## How does this happen?

Potomac Edison has launched a pilot program for hotels through the EmPower Maryland program. Star Energy has been selected to perform all PTAC & HVAC tune-ups and is paid directly through the utility, hotels never even receive a bill. This service is offered solely to Potomac Edison customers. In addition to the tune-up, Star Energy will provide you a comprehensive report on all of your equipment.

## How is this no cost to me?

The enhanced tune-ups are paid in full with funds from the EmPower Maryland energy incentive program. The funds are collected through a line item charge added to every utility bill in the state of Maryland - aptly called, "Empower Maryland Fund". Hotels will be serviced on first come, first serve basis.

## Benefits of participating in this pilot program:

- Improved corporate inspections
- Lower utility bills
- Work performed by Star Energy's certified HVAC technicians
- Your report includes list of all equipment; age of each unit, make, model and serial numbers
- Star Energy handles all administration work

Please contact Star Energy at (443)906-0140 or email [ab@starenergy.biz](mailto:ab@starenergy.biz) for more information or to schedule your tune-ups!
